

At-a-Glance Checklist

NOTE: A manufactured home is energy efficient if it meets the following energy efficiency levels as set forth in code (SC Code of Laws 12-36-2110 (B)):

- Storm or double pane glass windows
 - Insulated or storm doors
 - A minimum insulation thermal resistance rating of
 - R-11 for walls
 - R-19 for floors
 - R-30 for ceilings
 - **OR** allowances in the energy efficiency levels for walls, floors, and ceilings so long as the heat loss does not exceed that calculated using the R levels stated above. These heat loss calculations are based on the current edition of the American Society of Heating, Refrigerating, and Air Conditioning Engineers (ASHRAE) Guide at the time of the home's manufacture.
-

Checklist for Manufacturer:

- ☐ Send a Label Request Form to Energy Office
- ☐ Place a permanent energy efficiency label on the electrical panel
- ☐ Place the NOTICE on the window nearest the front door
